

John Escobedo

Senior QA Test Lead | UAT & Test Strategy | Healthcare & Government Systems

letmeshowyou@gmail.com

(512) 299-3269

Austin, Texas

Summary: Quality and business analysis professional with 18+ years building the foundations that make software shippable. I specialize in establishing QA functions from zero—introducing version control discipline, release candidate processes, and documentation standards to teams shipping without structure. Background spans healthcare, gaming, e-commerce, and government systems, with deep expertise in requirements documentation, UAT leadership, and cross-functional collaboration. Trilingual communicator (English, Spanish, ASL) with a track record of influencing stakeholders, driving change, and enabling teams to catch defects locally instead of chasing emergencies in production.

Skills

Business Analysis: Requirements Elicitation, User Stories & Acceptance Criteria, Process Mapping & Documentation, Gap Analysis

Leadership & Process: QA Process Implementation, Team Leadership, Process Standardization, SDLC

Testing Methodologies & Frameworks: Agile Testing, Regression Testing, User Acceptance Testing (UAT), Test Planning

Test Management & Documentation: JIRA/Xray, TestRail, Test Case Design, Bug Reporting

Accessibility & Inclusive Design: 508 Compliance Testing, WCAG Awareness, Assistive Technology Familiarity, Inclusive Product Advocacy

Platforms & Environments: Web Applications, Mobile (iOS/Android), Desktop (PC, Mac, Linux), Cross-browser/Cross-platform

Tools & Technologies: GitHub, Chrome Developer Tools, SQL / JQL, JavaScript/HTML/CSS

Industry Expertise: Healthcare & Telehealth, Gaming & Entertainment, Educational Technology, Live Events & Hosting

Office and Image Suites: Adobe Creative Suite, Office 365: Teams, Word, Excel, PowerPoint, Outlook, Google Workspace: Drive, Docs, Sheets, Canva

Professional Experience

Senior QA Test Lead | Quality Assurance Tester | Scrum Master

GeekSI | Tallahassee, FL

March 2019 to June 2025

Senior contractor providing requirements analysis, UAT leadership, and quality assurance across multiple mission-critical VA healthcare projects. Subject matter expert for complex clinical modules, facilitating knowledge transfer and driving process standardization across distributed teams.

- Became the go-to SME for the Traumatic Brain Injury module, running knowledge transfer sessions that enabled cross-functional teams to navigate complex healthcare domain requirements.
- Championed the transition from Waterfall to Agile, introducing release discipline and predictable delivery cycles to teams accustomed to ad-hoc shipping practices.
- Advocated for and implemented code freeze and release candidate practices, shifting teams from reactive firefighting to proactive quality control.
- Drove standardization of testing practices and documentation across multiple VA projects, building consensus among distributed teams and reducing onboarding time for new analysts.
- Advocated for accessibility as a core quality metric, leading 508 compliance initiatives and educating team members on inclusive design requirements.
- Collaborated with automation engineers to validate Cucumber/Selenium scripts, catching requirement-execution gaps before automated tests went into rotation.
- Built requirements traceability documentation that mapped every business need to test coverage across web, mainframe, and mobile platforms.

Senior QA Test Lead | Quality Assurance Tester

EverlyWell | Austin, TX
June 2018 to October 2018

Partnered with engineering and product leadership to establish quality processes and design cross-team workflows for a health tech startup's secure patient portal during a period of rapid organizational change.

- Designed a unified JIRA workflow, facilitating smoother cross-team collaboration and visibility into release status.
- Assessed release risks and communicated go/no-go recommendations to product and engineering leadership, balancing speed-to-market with quality.
- Defined initial QA process and release validation criteria for a team shipping without formal quality gates, establishing standards that brought predictability to a fast-moving startup environment.
- Mentored team members on effective documentation practices and quality standards to foster a culture of quality across the organization.
- Validated releases across all major browsers and mobile devices, catching requirement gaps before production deployment.

QA Test Lead | QA Analyst

YouScience | Austin, TX
July 2017 to June 2018

As the sole QA resource, built comprehensive quality processes and test infrastructure for the company's flagship education assessment platform, earning credibility with development and product teams.

- Introduced foundational quality practices—version control discipline, release candidates, and structured validation—to a team shipping without formal QA process, establishing credibility that integrated quality as a respected part of the SDLC.
- Created end-to-end test documentation spanning procedures, requirements traceability, and verification standards.
- Improved developer-QA communication by introducing standardized user story and acceptance criteria templates, reducing ambiguity and accelerating delivery.
- Created and maintained product documentation to support new feature releases and ensure consistent understanding of requirements.
- Owned end-to-end validation for the flagship web application, gating every release across browsers and mobile platforms.

QA Tester | QA Analyst

Luna Data Solutions | Austin, TX
May 2015 to May 2017

Contracted as QA Analyst for RetailMeNot, coordinating cross-team efforts for high-visibility e-commerce feature launches and aligning testing priorities with business objectives.

- Coordinated QA efforts across multiple teams for the gift card feature launch supporting a \$22M acquisition, aligning testing priorities with business objectives and leadership expectations.
- Built custom JavaScript tools to validate site-wide analytics implementation and data integrity, ensuring business requirements were accurately captured.
- Created standardized test documentation and data suites that eliminated inconsistencies across testing environments.
- Responded to live production issues under pressure, triaging problems and communicating status updates to leadership during critical outages.
- Partnered with developers to enhance internal tooling, ensure a CI/CD workflow, and contribute improvements that increased team efficiency.
