

John Escobedo

Business Analyst | Requirements & Stakeholder Management | Healthcare & Government Systems

letmeshowyou@gmail.com

(512) 299-3269

Austin, Texas

Summary: Business Analyst with 18+ years ensuring what gets built matches what the business needs. I specialize in establishing quality foundations from zero—introducing release discipline, documentation standards, and structured validation to teams shipping without process. Career spans healthcare, government, and technology systems, with deep expertise in requirements documentation, process analysis, UAT coordination, and stakeholder communication. Experienced in gap analysis, change management, and enabling teams to catch defects locally instead of chasing emergencies in production. Trilingual communicator (English, Spanish, ASL) skilled at bridging technical and non-technical stakeholders.

Skills

Business Analysis: Requirements Elicitation, User Stories & Acceptance Criteria, Process Mapping & Documentation, Gap Analysis

Problem-Solving & Analysis: Attention to Detail, Analytical Thinking, Problem-Solving, Critical Thinking

Leadership & Process: QA Process Implementation, Team Leadership, Process Standardization, SDLC

Testing Methodologies & Frameworks: Agile Testing, Regression Testing, User Acceptance Testing (UAT), Test Planning

Interpersonal & Collaboration: Clear Communication, Curiosity, Cross-functional Collaboration, Mentoring

Accessibility & Inclusive Design: 508 Compliance Testing, WCAG Awareness, Assistive Technology Familiarity, Inclusive Product Advocacy

Tools & Technologies: GitHub, Chrome Developer Tools, SQL / JQL, JavaScript/HTML/CSS

Industry Expertise: Healthcare & Telehealth, Gaming & Entertainment, Educational Technology, Live Events & Hosting

Office and Image Suites: Adobe Creative Suite, Office 365: Teams, Word, Excel, PowerPoint, Outlook, Google Workspace: Drive, Docs, Sheets, Canva

Professional Experience

Senior QA Test Lead | Quality Assurance Tester | Scrum Master

GeekSI | Tallahassee, FL

March 2019 to June 2025

Senior contractor providing requirements analysis, UAT leadership, and quality assurance across multiple mission-critical VA healthcare projects. Subject matter expert for complex clinical modules, facilitating knowledge transfer and driving process standardization across distributed teams.

- Became the go-to SME for the Traumatic Brain Injury module, running knowledge transfer sessions that enabled cross-functional teams to navigate complex healthcare domain requirements.
- Championed the transition from Waterfall to Agile, introducing release discipline and predictable delivery cycles to teams accustomed to ad-hoc shipping practices.
- Advocated for and implemented code freeze and release candidate practices, shifting teams from reactive firefighting to proactive quality control.
- Drove standardization of testing practices and documentation across multiple VA projects, building consensus among distributed teams and reducing onboarding time for new analysts.
- Advocated for accessibility as a core quality metric, leading 508 compliance initiatives and educating team members on inclusive design requirements.
- Collaborated with automation engineers to validate Cucumber/Selenium scripts, catching requirement-execution gaps before automated tests went into rotation.
- Built requirements traceability documentation that mapped every business need to test coverage across web, mainframe, and mobile platforms.

Senior QA Test Lead | Quality Assurance Tester

EverlyWell | Austin, TX
June 2018 to October 2018

Partnered with engineering and product leadership to establish quality processes and design cross-team workflows for a health tech startup's secure patient portal during a period of rapid organizational change.

- Designed a unified JIRA workflow, facilitating smoother cross-team collaboration and visibility into release status.
- Assessed release risks and communicated go/no-go recommendations to product and engineering leadership, balancing speed-to-market with quality.
- Defined initial QA process and release validation criteria for a team shipping without formal quality gates, establishing standards that brought predictability to a fast-moving startup environment.
- Mentored team members on effective documentation practices and quality standards to foster a culture of quality across the organization.
- Validated releases across all major browsers and mobile devices, catching requirement gaps before production deployment.

QA Test Lead | QA Analyst

YouScience | Austin, TX
July 2017 to June 2018

As the sole QA resource, built comprehensive quality processes and test infrastructure for the company's flagship education assessment platform, earning credibility with development and product teams.

- Introduced foundational quality practices—version control discipline, release candidates, and structured validation—to a team shipping without formal QA process, establishing credibility that integrated quality as a respected part of the SDLC.
- Created end-to-end test documentation spanning procedures, requirements traceability, and verification standards.
- Improved developer-QA communication by introducing standardized user story and acceptance criteria templates, reducing ambiguity and accelerating delivery.
- Created and maintained product documentation to support new feature releases and ensure consistent understanding of requirements.
- Owned end-to-end validation for the flagship web application, gating every release across browsers and mobile platforms.

QA Test Lead, QA Analyst

Communication Services for the Deaf | Austin, TX
May 2013 to January 2015

Developed inaugural QA process for an accessibility-focused video interpreting platform, immersing in user community to ensure product truly met the needs of Deaf and hard-of-hearing users.

- Invested in learning American Sign Language and Deaf cultural norms to understand user needs and ensure the product truly served its community—a user research approach that informed requirements validation.
- Established the company's first-ever quality assurance function from zero, defining test procedures and quality benchmarks that enabled the team to identify non-functional code blocking product delivery.
- Managed full validation lifecycle including creating test plans, executing test runs, and reporting results to stakeholders for both web and mobile platforms.
- Solved cross-platform testing limitations by implementing a VirtualBox-based solution, expanding test coverage to previously unreachable environments.

Education

Austin Community College
American Sign Language
2015 - 2017
