PROFESSIONAL EXPERIENCE

Software Tester (Volunteer)

Sharpee.net | Austin, TX (Remote)

March 2026 to Present

Performed exploratory testing on a new web application, found silent-failure bugs that scripted tests missed, and contributed fixes and documentation directly to the codebase.

- Ran end-to-end exploratory testing across browsers and platforms, validating full user workflows.

- Caught silent-failure bugs that scripted tests missed, including cases where the app returned blank responses with no error signal.
 - Built a custom failure-report template so any reader, technical or not, could immediately see what broke.
-

Robot Tele-Operator

Apptronik (via Insight Global) | Austin, TX

July 2025 to September 2025

Tested and documented humanoid robot behavior for Apptronik, writing procedures and bug reports engineering could act on directly.

- Cut physical test setup time by 75% by standardizing the preparation pattern, giving data collection consistent, repeatable conditions.
 - Turned observed robot behaviors into clear bug reports engineering could act on immediately.
 - Wrote startup, shutdown, and emergency shutdown procedures for 2 robot models where none existed, cutting new-tester ramp-up time by roughly 50% and becoming the team standard.
-

Senior QA Test Lead | Quality Assurance Tester | Scrum Master

GeekSI | Tallahassee, FL

March 2019 to June 2025

Led QA, UAT, and requirements analysis across multiple VA healthcare projects, drove Agile process adoption, and served as SME for complex clinical modules.

- Became the go-to SME for the Traumatic Brain Injury module, running knowledge transfer sessions so cross-functional teams could navigate the clinical requirements.
 - Drove the Waterfall-to-Agile transition, introducing code freeze and release-candidate practices that shifted teams from reactive firefighting to predictable delivery.
 - Managed test cases, defects, requirements documentation, and project dashboards in JIRA and Confluence across 6+ years and multiple VA projects.
 - Ran SOAP API testing on VA home loan .NET applications and REST API testing via Postman on Java healthcare modules, validating service queries, data contracts, and data integrity.
 - Built and executed test strategies for VA clinical healthcare applications across .NET and Java, covering UAT, regression, integration, smoke, sanity, end-to-end, and 508 compliance.
 - Led 508 compliance initiatives and performed hands-on JAWS and NVDA screen-reader validation on VA clinical interfaces, catching accessibility issues visual inspection misses.
 - Partnered with automation engineers to validate Cucumber and Selenium scripts, catching requirement-to-execution gaps before tests went into rotation.
 - Built requirements traceability documentation mapping every business need to test coverage across web, mainframe, and mobile.
-

Senior QA Test Lead | Quality Assurance Tester

EverlyWell | Austin, TX

June 2018 to October 2018

Established QA processes and JIRA workflows from the ground up for a health tech startup's secure patient portal, partnering with engineering and product leadership on release validation.

- As JIRA administrator, designed a unified workflow with custom issue types, permission schemes, notifications, and dashboards, giving engineering and product real-time visibility into release status.
- Defined the initial QA process and release validation criteria for a team shipping without formal quality gates, bringing predictability to a fast-moving startup.
- Assessed release risk and delivered go/no-go recommendations to product and engineering leadership, balancing speed to market with quality.
- Validated releases across major browsers and mobile devices, catching requirement gaps before production.

QA Test Lead | QA Analyst

YouScience | Austin, TX
July 2017 to June 2018

As sole QA, built quality processes and test infrastructure from zero for the flagship education assessment platform, earning trust with development and product teams.

- Introduced foundational quality practices, including version control discipline, release candidates, and structured validation, to a team shipping without formal QA process, integrating quality as a respected part of the SDLC.
- Created end-to-end test and product documentation covering procedures, requirements traceability, verification standards, and feature release notes.
- Standardized user story and acceptance criteria templates, reducing ambiguity between developers and QA and speeding up delivery.
- Owned end-to-end validation for the flagship web application, gating every release across browsers and mobile platforms.

QA Tester | QA Analyst

Luna Data Solutions | Austin, TX
May 2015 to May 2017

QA Analyst contracted to RetailMeNot, coordinating cross-team testing for high-visibility e-commerce launches and aligning test priorities with business needs.

- Coordinated QA across multiple teams for the gift card feature launch supporting a \$22M acquisition, aligning test priorities with leadership expectations.
- Built custom JavaScript tools to validate site-wide analytics implementation and data integrity across the product.
- Triaged live production issues under pressure, communicating status updates to leadership during outages.
- Partnered with developers to improve internal tooling and CI/CD workflow, contributing changes that increased team efficiency.
